

# UTAH COPPER MILL READY FOR MORE

Eighth Section Ready Within  
Week, While Ninth Soon  
Will Be Active.

## MANAGER JACKLING GETTING OUT REPORT

Interesting Data Is Being Pre-  
pared for the Coming  
Annual Session.

"We will have the eighth section of our Garfield mill in operation within a week, and we will have the ninth section in full swing before the end of the month," stated General Manager D. C. Jackling of the Utah Copper company, Friday afternoon. Mr. Jackling had just returned to his desk from a week's trip to Colorado Springs, where he had a conference with the officials of the company. At this meeting, stated Mr. Jackling, the various details of the company were discussed, also the details of the annual report of the company, which will be prepared and submitted to the annual stockholders' meeting in January.

The report proper will deal only with the affairs of the Utah Copper company during the last fiscal year, the year ending several months ago. During the year the company placed in operation the new concentrating plant at Garfield, or since last June, so the results of the new mill, as far as possible, to be given, will be told the stockholders next month in an appendix to the report proper. This latter part of the managers' report will disclose some of the most gratifying conditions of which any copper producer of the country can boast.

During the uncertain period and financial crisis through which the country has been passing, one organization, the Utah Copper company, kept its properties going full tilt, adding new sections to its plant, and making a splendid tonnage of ore-grade Bingham porphyry rock. At the present time the management is milling over 4000 tons of crude ore per day, the general average of last month also being over that figure. On Thursday of the present week the management treated 4000 tons but this was an unusual day, stated Mr. Jackling yesterday.

President C. M. MacNeill and Secretary Spencer Penrose of this organization are expected in Salt Lake to look over the mine and mill in a few days. Mr. Jackling states that the Utah Copper company will call no halt in its operations, but will crowd on all speed possible along all lines.

**Ore Shipments.**  
The Pioneer sampler on Friday released the following number of cars of ore: Utah, 5.  
The Taylor & Branton company released the following: Utah, 6; Idaho, 1; Nevada, 3.  
**J. OBERNDORFER, STOCK BROKER,** 161 S. Main. Tel. Bell 792.

# FIFTY BOSTON CON. MEN OUT ON STRIKE

Quit Because of Reduction in  
Pay of 25 and 50  
Cents.

Special to The Tribune.

BINGHAM, Dec. 6.—Fifty miners employed by the Boston Consolidated Mining company here struck today when the company reduced their wages from \$3.50 and \$3.25 to \$3.

The mine owners claim their agreement with the miners' union states that when copper is below 15 cents the miners are to accept \$2.75 and \$3.00 a day for their work. It was under this clause in the agreement that the reduction was ordered Friday. The miners say that they can get all the non-union help they need.

It is rumored that all the mine owners here are contemplating reducing wages to \$3 and \$2.75.

## YAMPA OFFICIAL IS LOOKING OVER INTERESTS

E. B. Schley, son of the president of the Tintic Mining and Development company, is in Salt Lake from his New York headquarters, where he is accompanied by General Manager John Darn. Mr. Schley will find a very satisfactory condition prevailing at the Yampa enterprises. The company has been adding to its quota of miners and smelters during the past few weeks, securing practically all the pick of the old force, until at the present time there are 167 men on the payroll. Of the battery of three reverberatory and two blast furnaces now being warmed up, two reverberatory and one blast furnace are now pouring forth matte. Since the resumption of smelter work, the management had made something like 100 tons of matte. It will not be many days before all the furnaces are sufficiently heated to allow smelting along old-time lines again. The smelter is working in splendid order and everything points to an uninterrupted stretch of activity from now on.

## OVER HUNDRED CARS ORE SHIPPED FROM TINTIC

Special to The Tribune.  
TINTIC, Dec. 6.—The Tintic ore shipments, in cars, for this week have been:  
Colorado 4  
Eureka Hill 4  
Bullion 4  
Mammoth 4  
Black Jack 2  
Tintic 11  
Yankee Consolidated 4  
Centennial Eureka 45  
Lower Mammoth 2  
Mitchell 2  
Scranton 2  
Total 101  
One carload of concentrates was sent from the May Day mine.

# NORTH AND SOUTH DRIFTS HAVE ORE

Significant Find Made on Low-  
est Level of Lower Mam-  
moth Mine.

## GOOD REPORTS ARE COMING IN DAILY

South Drift Friday Shows Full  
Face of Very Satisfac-  
tory Ore.

The management of the Lower Mammoth company on Friday was having some assays put through the fire on which is centered considerable interest. The rock came from the south drift on the 1800-foot level. This south drift is one started a short time ago from the east crest, which first was tapped into the great ore body expected. Two drifts were started on the fissure, the same being a few inches wide at the point of starting. The first was centered on the north drift, for the reason that it continued to disclose an ever-increasing size of the fissure and ore contained as the work went forward.

Now the south drift holds the center of the slugging General Manager John Darn stated Friday that Superintendent Brown had just telephoned that Thursday this drift had penetrated what so far looked like a very promising amount of ore. The last round of holes that night disclosed a whole face of ore, and against this drift was put an extremely gratifying chute, the entire face is being pushed at this time. The north drift is also maintaining its record of increasing improvement, and Mr. Brown expressed himself as delighted with these two significant developments.

Since a decided turn for the better in the depths of the Lower Mammoth has been cleared, the company atmosphere is splendidly and eagerly connected with the property is wearing a smile that has a pardonable tinge of "I told you so" about it. Present disclosures are taken as the index to some mighty gratifying results due now at any hour.

**New York Mining Stocks.**

**Big Copper Output.**  
James A. Pollock & Co., bankers and brokers, 6 West Second South, furnish the following, received over their private wire yesterday afternoon:  
Boston News Bureau—The record-breaking exports of copper, amounting to 76,000,000 pounds, in November, compare with 62,000,000 last year. The feature of the past month was that Holland passed from first place as the largest recipient of American copper, to second place. England takes first place. October figures show that there were 12,000,000 pounds of copper consigned to that country from America, compared with 18,000,000 pounds in Holland.  
Holland, in November, there was shipped to England 22,000,000 pounds, against 10,000,000 pounds to Holland.

**New York Letter.**  
James A. Pollock & Co., bankers and brokers, 6 West Second South, furnish the following, received over their private wire yesterday afternoon:  
Walker Bros. Stock Letter—New York—This opening was steady and developed a great deal of strength. There was heavy short covering and little stock for sale. The tone was good and the market looked long. In the afternoon there was a reaction on profit-taking and the idea that the market had come up too fast. The close was about steady and without any pressure. The market looks like a purchase on these reactions.

**Tribune Agents in Nevada.**  
Copies of The Tribune will be found on sale in Nevada at the following:

**WILL SMELTERS COME THROUGH FOR NEVADA**  
It begins to look as if the smelting companies which have been giving Goldfield and Nevada mine operators the small end of the stick are going to reverse matters. The Nevada Chamber of Commerce committee, Frank A. Leach, Director of the Mint, has written a letter in which he sends some daylight into the situation. Mr. Leach's letter, as reproduced by the Goldfield Tribune, is as follows:  
"Knowing one of the principal business agents of the American Smelting and Refining company, I called his attention to the fact that the smelting plant at Goldfield, which seemed to be justifiable. He came down to Washington especially to discuss the situation in Goldfield with me, and he explained the smelter's side of the difficulty, and when his attention was called to the fact that the smelting plant was a loss, he explained the situation. He said it might be true, and freely stated that he would take the matter up with the people immediately, and see what could be done to relieve the situation. The Government is doing everything it can to keep the law to keep up the circulation of money, and if your product was in the shape of bullion there would be no trouble of your realizing upon it. Immediately it was delivered at one of the United States mints or assay offices, but there is no possibility in which advances can be made on ore, or such product handled."  
"FRANK A. LEACH,  
"Director of Mint."

With the settlement of the labor difficulties in Nevada, Goldfield in particular, the world began to expect an output of ore carrying the yellow metal in generous quantities that will fairly astonish the circles that deem themselves made on ore, or such product handled.

# LITTLE BELL DRIFT GOING AFTER ORES

Park City Property Shortly  
Will Be Producing Ores  
Again.

In answer to inquiries Friday regarding the present condition of Little Bell drift, General Manager John Darn stated that the company had been idle in this property for some time past owing to the amount of water that had come in via the lower workings, or below the 700-foot level. But at the present time, under an arrangement with the Daly West company, a drift is being driven into the Little Bell possessions, the same being directed toward the point above which the Little Bell management some time ago developed a splendid ore chute for a great distance.

This drift will get in under the lower waters, but at least 300 feet greater depth vertically, and the work is so planned that no trouble is anticipated in handling all the water that will be encountered during the progress of the drift. The Little Bell company followed by means of a winze the ore body from the 700 level, going down something like 250 feet, all in ore. The ore chute ran from 10 to 15 feet in width, but owing to the small amount of drifting that had been done the management is not in a position now to predict exactly how extensive the ore body will be. However, it is a splendid resource, however, and will be available for the Little Bell company with some delay. That means more shipments and profits for this Park City organization.

**Nevadas in San Francisco.**
